

Resume Screening Report

Role: Senior ML/AI Research Scientist | May 12, 2026

Candidate Rankings

#	Name	Score	Decision	Key Strength	Key Weakness
1	ASHA PATEL	9.3/10	Strong Yes	- Exceptional research background with numerous publications in top-tier conferences (ACL, EMNLP, NeurIPS, ICLR) and a Best Paper Award. - Deep expertise in NLP, LLMs, and Transformer architectures, including efficient fine-tuning and optimization techniques.	- Lack of explicit experience with RAG pipelines, Prompt Engineering, and Vector Databases. - No explicit mention of Docker, Kubernetes, or specific FastAPI/Flask for model deployment.
2	Neha Sharma	8.0/10	Strong Yes	- Exceptional research background with multiple top-tier publications (ICLR, NeurIPS, ICML). - Strong expertise in deep learning frameworks (PyTorch, TensorFlow, JAX) and advanced ML optimization techniques (Model Compression, NAS, CUDA).	- Lacks explicit experience with specific LLM technologies (Transformers, RAG pipelines, Prompt Engineering, Vector databases). - Limited explicit experience with major cloud platforms (AWS/GCP) and specific MLOps tools (MLflow, Kubeflow).
3	VIKRAM SINGH	3.9/10	No	- Strong academic background (M.S. from IIT Madras in Statistics and Data Science) - Proven ability to drive business impact through data science (quantified achievements)	- Lacks core deep learning, NLP, LLM, and transformer expertise required for the research scientist role - Experience (4+ years) is below the required 6+ years for a senior position
4	ADITYA GUPTA	2.6/10	No	- Strong foundational engineering skills (Python, Git, System Design, CI/CD) - Experience with cloud platforms (AWS EC2, S3, Lambda)	- Lacks core ML/AI research skills (deep learning frameworks, NLP, LLMs, RAG, ML optimization, vector databases) - Experience is in full-stack web development, not ML/AI research

#1 — ASHA PATEL (9.3/10)

Skills Match: 8.5 | Experience Relevance: 9.5 | Education Certs: 9.0 | Project Relevance: 9.5 | Communication Quality: 9.0

Strengths: Exceptional research background with numerous publications in top-tier conferences (ACL, EMNLP, NeurIPS, ICLR) and a Best Paper Award.; Deep expertise in NLP, LLMs, and Transformer architectures, including efficient fine-tuning and optimization techniques.; Strong academic credentials with a Ph.D. from a leading institution.

Weaknesses: Lack of explicit experience with RAG pipelines, Prompt Engineering, and Vector Databases.; No explicit mention of Docker, Kubernetes, or specific FastAPI/Flask for model deployment.; No relevant cloud certifications.

#2 — Neha Sharma (8.0/10)

Skills Match: 6.5 | Experience Relevance: 7.0 | Education Certs: 8.5 | Project Relevance: 9.0 | Communication Quality: 9.0

Strengths: Exceptional research background with multiple top-tier publications (ICLR, NeurIPS, ICML).; Strong expertise in deep learning frameworks (PyTorch, TensorFlow, JAX) and advanced ML optimization techniques (Model Compression, NAS, CUDA).; Proven experience with distributed training and large-scale neural networks (Horovod, Ray).

Weaknesses: Lacks explicit experience with specific LLM technologies (Transformers, RAG pipelines, Prompt Engineering, Vector databases).; Limited explicit experience with major cloud platforms (AWS/GCP) and specific MLOps tools (MLflow, Kubeflow).; No explicit mention of Docker or Kubernetes for containerized ML deployment.

#3 — VIKRAM SINGH (3.9/10)

Skills Match: 2.0 | Experience Relevance: 2.0 | Education Certs: 8.0 | Project Relevance: 2.0 | Communication Quality: 9.0

Strengths: Strong academic background (M.S. from IIT Madras in Statistics and Data Science); Proven ability to drive business impact through data science (quantified achievements); Expertise in statistical analysis, time series forecasting, and A/B testing

Weaknesses: Lacks core deep learning, NLP, LLM, and transformer expertise required for the research scientist role; Experience (4+ years) is below the required 6+ years for a senior position; Experience domain is traditional data science, not advanced ML/AI research

#4 — ADITYA GUPTA (2.6/10)

Skills Match: 2.0 | Experience Relevance: 1.0 | Education Certs: 3.0 | Project Relevance: 0.5 | Communication Quality: 9.0

Strengths: Strong foundational engineering skills (Python, Git, System Design, CI/CD); Experience with cloud platforms (AWS EC2, S3, Lambda); Demonstrated leadership and mentoring abilities

Weaknesses: Lacks core ML/AI research skills (deep learning frameworks, NLP, LLMs, RAG, ML optimization, vector databases); Experience is in full-stack web development, not ML/AI research; Education (B.S.) does not meet the required Master's or Ph.D.
